

Greetings ARCA Student Members,

My name is Alexis Duggan, and I am your ARCA 2022-2023 Student Representative. I have a BA in Special Education from the University of North Florida and an M.S. in Counselor Education from Florida International University. My love for individuals with disabilities started as a Special Education teacher where I served students with varying disabilities for five years. In 2019 I transitioned into Vocational Rehabilitation where I worked to assist adults and adolescents with disabilities gain independent living resources, reach their career aspirations, and increase their overall mental health. As a current Licensed Professional Counselor Associate under supervision, I have gained a new love for veterans and archaeology and have completed two archaeological digs in Sicily, Italy and San Antonio, Texas.

I am currently working to receive my doctorate degree in higher education at Texas A&M University Commerce. As your ARCA student representative, I hope to bring our student population together to create opportunities to connect with other organizations within our field, shine a light on important topics that affect students, and increase our student membership. I am excited to be your student representative and look forward to serving you!

Thank you,

Alexis Duggan, M.S., CRC, LPC-Associate

Doctoral Candidate Supervised by Lina Moffett, Ed.D., LPC-Supervisor
